

a taxpayer's interest rate risk from a floating rate borrowing may be reduced by the purchase of debt instruments that bear a comparable floating rate. The acquisition of the debt instruments, however, is not a hedging transaction because the transaction is not entered into primarily to reduce the taxpayer's risk. Similarly, borrowings generally are not made primarily to reduce risk.

(4) *Normal course.* Solely for purposes of paragraph (b) of this section, if a transaction is entered into in furtherance of a taxpayer's trade or business, the transaction is entered into in the normal course of the taxpayer's trade or business. This rule applies even if the risk to be reduced relates to the expansion of an existing business or the acquisition of a new trade or business.

(5) *Ordinary property and obligations—*
(i) *In general.* Except as provided in paragraph (g)(3) of this section (which contains transition rules), property is ordinary property to a taxpayer only if a sale or exchange of the property by the taxpayer could not produce capital gain or loss regardless of the taxpayer's holding period when the sale or exchange occurs. Thus, for example, property used in a trade or business within the meaning of section 1231(b) (determined without regard to the holding period specified in that section) is not ordinary property. An obligation is an ordinary obligation if performance or termination of the obligation by the taxpayer could not produce capital gain or loss. For purposes of the preceding sentence, termination has the same meaning as in section 1234A.

(ii) *Hedges of noninventory supplies.* Notwithstanding paragraph (c)(5)(i) of this section, if a taxpayer sells only a negligible amount of a noninventory supply, then, only for purposes of determining whether a transaction to hedge the purchase of that noninventory supply is a hedging transaction, the supply is treated as ordinary property. A noninventory supply is a supply that a taxpayer purchases for consumption in its trade or business and that is not an asset described in sections 1221(1) through (5).

(6) *Borrowings.* Whether hedges of a taxpayer's debt issuances (borrowings) are hedging transactions is determined

without regard to the use of the proceeds of the borrowing.

(7) *Hedging an aggregate risk.* The term hedging transaction includes a transaction that reduces an aggregate risk of interest rate changes, price changes, and/or currency fluctuations only if all of the risk, or all but a de minimis amount of the risk, is with respect to ordinary property, ordinary obligations, and borrowings.

(d) *Hedging by members of a consolidated group—*(1) *General rule: single-entity approach.* For purposes of this section, the risk of one member of a consolidated group is treated as the risk of the other members as if all of the members of the group were divisions of a single corporation. For example, if any member of a consolidated group hedges the risk of another member of the group by entering into a transaction with a third party, that transaction may potentially qualify as a hedging transaction. Conversely, intercompany transactions are not hedging transactions because, when considered as transactions between divisions of a single corporation, they do not reduce the risk of that single corporation.

(2) *Separate-entity election.* In lieu of the single-entity approach specified in paragraph (d)(1) of this section, a consolidated group may elect separate-entity treatment of its hedging transactions. If a group makes this separate-entity election, the following rules apply.

(i) *Risk of one member not risk of other members.* Notwithstanding paragraph (d)(1) of this section, the risk of one member is not treated as the risk of other members.

(ii) *Intercompany transactions.* An intercompany transaction is a hedging transaction (an intercompany hedging transaction) with respect to a member of a consolidated group if and only if it meets the following requirements—

(A) The position of the member in the intercompany transaction would qualify as a hedging transaction with respect to the member (taking into account paragraph (d)(2)(i) of this section) if the member had entered into the transaction with an unrelated party; and

(B) The position of the other member (the marking member) in the transaction is marked to market under the marking member's method of accounting.

(iii) *Treatment of intercompany hedging transactions.* An intercompany hedging transaction (that is, a transaction that meets the requirements of paragraphs (d)(2)(ii) (A) and (B) of this section) is subject to the following rules—

(A) The character and timing rules of § 1.1502-13 do not apply to the income, deduction, gain, or loss from the intercompany hedging transaction; and

(B) Except as provided in paragraph (f)(3) of this section, the character of the marking member's gain or loss from the transaction is ordinary.

(iv) *Making and revoking the election.* Unless the Commissioner otherwise prescribes, the election described in this paragraph (d)(2) must be made in a separate statement saying "[Insert Name and Employer Identification Number of Common Parent] HEREBY ELECTS THE APPLICATION OF SECTION 1.1221-2(d)(2) (THE SEPARATE-ENTITY APPROACH)." The statement must also indicate the date as of which

the election is to be effective. The election must be signed by the common parent and filed with the group's federal income tax return for the taxable year that includes the first date for which the election is to apply. The election applies to all transactions entered into on or after the date so indicated. The election may be revoked only with the consent of the Commissioner.

(3) *Definitions.* For definitions of consolidated group, divisions of a single corporation, group, intercompany transactions, and member, see section 1502 and the regulations thereunder.

(4) *Examples.* The following examples illustrate this paragraph (d):

General Facts. In these examples, *O* and *H* are members of the same consolidated group. *O*'s business operations give rise to interest rate risk "*A*," which *O* wishes to hedge. *O* enters into an intercompany transaction with *H* that transfers the risk to *H*. *O*'s position in the intercompany transaction is "*B*," and *H*'s position in the transaction is "*C*." *H* enters into position "*D*" with a third party to reduce the interest rate risk it has with respect to its position *C*. *D* would be a hedging transaction with respect to risk *A* if *O*'s risk *A* were *H*'s risk.

Example 1. Single-entity treatment—(i) General rule. Under paragraph (d)(1) of this section, *O*'s risk *A* is treated as *H*'s risk, and therefore *D* is a hedging transaction with respect to risk *A*. Thus, the character of *D* is determined under the rules of this section, and the income, deduction, gain, or loss from *D* must be accounted for under a method of accounting that satisfies § 1.446-4. The intercompany transaction *B-C* is not a hedging transaction and is taken into account under § 1.1502-13.

(ii) *Identification.* *D* must be identified as a hedging transaction under paragraph (e)(1) of this section, and *A* must be identified as the hedged item under paragraph (e)(2) of this section. Under paragraph (e)(5) of this section,

the identification of *A* as the hedged item can be accomplished by identifying the positions in the intercompany transaction as hedges or hedged items, as appropriate. Thus, substantially contemporaneous with entering into *D*, *H* may identify *C* as the hedged item and *O* may identify *B* as a hedge and *A* as the hedged item.

Example 2. Separate-entity election; counterparty that does not mark to market. In addition to the *General Facts* stated above, assume that the group makes a separate-entity election under paragraph (d)(2) of this section. If *H* does not mark *C* to market under its method of accounting, then *B* is not a hedging transaction, and the *B-C* intercompany transaction is taken into account

under the rules of section 1502. *D* is not a hedging transaction with respect to *A*, but *D* may be a hedging transaction with respect to *C* if *C* is ordinary property or an ordinary obligation and if the other requirements of paragraph (b) of this section are met. If *D* is not part of a hedging transaction, then *D* may be part of a straddle for purposes of section 1092.

Example 3. Separate-entity election; counterparty that marks to market. The facts are the same as in *Example 2* above, except that *H* marks *C* to market under its method of accounting. Also assume that *B* would be a hedging transaction with respect to risk *A* if *O* had entered into that transaction with an unrelated party. Thus, for *O*, the *B-C* transaction is an intercompany hedging transaction with respect to *O*'s risk *A*, the character and timing rules of § 1.1502-13 do not apply to the *B-C* transaction, and *H*'s income, deduction, gain, or loss from *C* is ordinary. However, other attributes of the items from the *B-C* transaction are determined under § 1.1502-13. *D* is a hedging transaction with respect to *C* if it meets the requirements of paragraph (b) of this section.

(e) *Identification and recordkeeping—*

(1) *Same-day identification of hedging transactions.* A taxpayer that enters into a hedging transaction (including recycling an existing hedge) must identify it as a hedging transaction. This identification must be made before the close of the day on which the taxpayer enters into the transaction.

(2) *Substantially contemporaneous identification of hedged item—*(i) *Content of the identification.* A taxpayer that enters into a hedging transaction must identify the item, items, or aggregate risk being hedged. Identification of an item being hedged generally involves identifying a transaction that creates risk, and the type of risk that the transaction creates. For example, if a taxpayer is hedging the price risk with respect to its June purchases of corn inventory, the transaction being hedged is the June purchase of corn and the risk is price movements in the market where the taxpayer buys its corn. For additional rules concerning the content of this identification, see paragraph (e)(3) of this section.

(ii) *Timing of the identification.* The identification required by this paragraph (e)(2) must be made substantially contemporaneously with entering into the hedging transaction. An identification is not substantially contemporaneous if it is made more than 35 days

after entering into the hedging transaction.

(3) *Identification requirements for certain hedging transactions.* In the case of the hedging transactions described in this paragraph (e)(3), the identification under paragraph (e)(2) of this section must include the information specified.

(i) *Anticipatory asset hedges.* If the hedging transaction relates to the anticipated acquisition of assets by the taxpayer, the identification must include the expected date or dates of acquisition and the amounts expected to be acquired.

(ii) *Inventory hedges.* If the hedging transaction relates to the purchase or sale of inventory by the taxpayer, the identification is made by specifying the type or class of inventory to which the transaction relates. If the hedging transaction relates to specific purchases or sales, the identification must also include the expected dates of the purchases or sales and the amounts to be purchased or sold.

(iii) *Hedges of debt of the taxpayer—*(A) *Existing debt.* If the hedging transaction relates to accruals or payments under an issue of existing debt of the taxpayer, the identification must specify the issue and, if the hedge is for less than the full adjusted issue price or the full term of the debt, the amount and the term covered by the hedge.

(B) *Debt to be issued.* If the hedging transaction relates to the expected issuance of debt by the taxpayer or to accruals or payments under debt that is expected to be issued by the taxpayer, the identification must specify the following information: the expected date of issuance of the debt; the expected maturity or maturities; the total expected issue price of the issue; and the expected interest provisions. If the hedge is for less than the entire expected issue price of the debt or the full expected term of the debt, the identification must also include the amount or the term being hedged. The identification may indicate a range of dates, terms, and amounts, rather than specific dates, terms, or amounts. For example, a taxpayer might identify a transaction as hedging the yield on an anticipated issuance of fixed rate debt during the second half of its fiscal year, with the anticipated amount of
